FBT comes to UK

CIE-Group is to market Italian pro audio manufacturer FBT Elettronica's architectural /commercial installation products in the UK.

The exclusive distributor plans a nationwide launch of the complete product range this spring of this year.

'The appointment of FBT Audio Contractor is an essential part of our product development programme to access an even greater scale of high specification PA, VA and A-V systems', said CIE-Group head of marketing Chris Edwards.

'FBT brings a whole new range of advanced technology 100v line and low impedance branded products to the market at a time when product development in Europe has been significantly diminished due to the effects of RoHS on manufacturers last year.'
